

Gaming machin , Program, and Server

ABSTRACT

A gaming machine for a bingo game or other game using a matrix
5 card is provided, to which is added an element that enables a player
to make a selection that can influence the game result. A gaming
machine is provided wherein the designs of playing cards, etc.,
are used in the respective cells of the matrix card, a game is
started after allowing the cells to be shifted by each player,
10 and a predetermined benefit is provided to the player when all
cells of a line are made effective by lotteries and a winning
combination of a poker game, etc., is formed along the line.
